

## 2010 Energy Efficiency Programs

**Compact Fluorescent Lighting** - One of the fastest, simplest ways to save energy is by switching to compact fluorescent (CFL) bulbs for lighting your home or business. These efficient bulbs provide light comparable to that of conventional incandescent bulbs while using a fraction of the electricity. Keep watching for our 2010 CFL promotional dates.

**Appliance Rebates** - Today's appliances are more energy-efficient than those purchased ten or more years ago—especially Energy Star® appliances. Mid-States Services, LLC now offers a rebate application if you purchase a new Energy Star® clothes washer, dishwasher **if electric water heating is present**. A rebate is also available for an Energy Star® window air-conditioner. Appliances must be purchased from Mid-States Services, LLC and the rebate application must be completed and returned to Grundy Electric within 30 days of the appliance purchase.

Energy Star clothes washer - \$100 rebate

Energy Star dishwasher - \$50 rebate

Energy Star window air-conditioner - \$50 rebate

**Water Heater Rebate** - Grundy Electric now offers an electric water heater rebate for the replacement of an existing unit with an energy efficiency rating of less than .9 for a new higher efficient unit. The efficiency rating of the replacement unit must be a minimum of .9 or higher. Water heaters can be purchased from any dealer. All rebate applications must be completed and returned to GEC within 30 days of purchase to qualify.

Electric water heater -\$50 rebate

**Heating & Cooling Rebates** - Efficient Heating and Cooling - Today's heat pumps are more efficient than ever. They offer greater comfort and better reliability than their predecessors. Grundy Electric continues to offer ground source heat pump (GSHP) and dual fuel rebates for **prequalified installations**.

Dual Fuel Rebate - \$200 per ton rebate

GSHP Rebate - \$750 per ton rebate

**The Residential Energy Audit Program** was designed to provide members with an accurate assessment of the actual energy use in their home. For a nominal fee, GEC's certified energy consultant Randy Kinnison will complete an on-site, thorough energy audit and provide the member with a detailed evaluation of energy saving measures.

**Farm and Small Business Audit Program** - Grundy Electric has implemented an energy audit program specifically designed for farmers and small rural businesses. The Farm and Small Business Audit Program identifies ways to become more energy efficient (qualifying farms must have 50% of family income from the farm operation). The thorough and professional energy audit will be provided for a minimal charge to members and non-members.
